Pinfire Guns USA 2mm, 8-Shot RING GUN

Version 2.0

Exclusive to Pinfire Guns USA, the most unique and elaborate item in our Spy Gun series is a limited and numbered edition (**ONLY 7** in the World) 8-shot pepperbox RING GUN! Which includes, of course your size 8.5 or size 12 numbered Ring, **BOTH** BLUED-STEEL **AND** POLISHED-STEEL 8-Shot matching numbered cylinders, a sapphire embedded barrel screw, a plain barrel screw, and a custom/numbered special screwdriver that has been created to be used for BOTH of the barrel screws that are included with your Ring Gun package. Each is made entirely by hand by master craftsman Rosen for us at Pinfire Guns USA. Each has a Gold-Filled Rope designed Band, Gold-Plated Cylinder Base, and a Stainless Steel Pepperbox Cylinder (polished or blued). No more than 20 of these Ring Guns will ever be made in this series - get yours before they are gone! There are **ONLY two Size 8.5**, and **four Size 12**, but they can be easily resized by almost **ANY** local jeweler.

Antique 3mm or 4mm pinfire ring guns have been featured and sold for several thousand dollars and in hard to find places, such as high-end auctions and even on a pawn stars episode. We are excited to have commissioned this updated version which fires the more readily available 2mm pinfire blanks and live rounds(links below)

•IMAGES/PICTURES: PLEASE REVIEW CAREFULLY! ALL of the pics are of the IN-STOCK **BASIC RING GUN MODELS** in both cylinder types. This is our **NEWEST RING GUN MODEL WITH SOME CUSTOMIZATION available**. The Last 3 images are of our owner's ring gun w/additional gold-work and diamonds. This a little more elaborate of a ring gun, BUT it is almost EXACTLY WHAT YOU WILL RECEIVE IF ORDERING - YOU CAN ALSO Have more elaborate silver, gold, emeralds, rubies, sapphires, diamonds - we will **WORK WITH YOU** and give you a **QUOTE** to decide, OR if you want to provide your own gem stones, we can add them to your Ring Gun.

Are you wanting to use part of a ring that is sentimental to you, as the band? NO Problem, Take a look at our Version 1.0 Ring Guns, those can be merged with almost any existing ring band.
