2mm Pinfire Live Rounds/Caps "Flat-Top/Wadcutter"

PRE-FILLED W/FITTED LEAD WAD (20/per order)

FREE GIFT w/PURCHASE OF 2+ ORDERS - AN ALUMINUM MINI TARGET (while supplies last)

Do NOT attempt to use any live round in a vented barrel (no through-barrel) mini

These include a 10% discount from our normal 10 round packs of Flat-Top Live Rounds. These are the Packs of **20 (TWENTY)** 2mm live wadcutter hand loads (pre-loaded) for through-barrel (not "vented" as some of the berloque guns were made) 2mm pinfire guns. There are two types of "live rounds" for 2mm pinfire guns - this listing is for the pre-made, flat-top version which takes all the work out of making them by hand. The other is a "Lead Ball Home-Made" Live Round, using a 2mm pinfire blank cartridge and a lead ball (both separate listings) and the ball is hand-loaded into the blank (can not be used in some minis due to the ball sticking out slightly, such as Xythos).

SAFETY FIRST: You must ensure you know what will and won't work in your mini, so **READ ALL RELATED LISTINGS FULLY & ASK IF UNSURE PRIOR TO ORDERING!** Live Rounds are powerful enough to go about 6 inches into ballistics gelatin and straight through a steel can. If you don't believe that, please check out our Facebook page Videos to see the 2mm vs ballistics gelatin to see for yourself. They are also about as loud as a .22 caliber short round and have the force of a BB gun or air gun. These are not considered Ammunition by the US ATFEB, and produce less than 1 (.97) joule of energy)

SAFETY STILL FIRST: IF YOU DO USE THESE LIVE ROUNDS FOR ANY OTHER REASON OTHER THAN FOR DISPLAY, PLEASE: **ADULT USE ONLY** and sure that you follow all the safety rules as if this were a real firearm, keep your finger off the trigger until you are ready to fire, treat all guns (including these miniatures) as if they are always loaded, always use eye and ear protection when firing, make sure that nothing is blocking your barrel, that you have a secure backstop and you know what is beyond, and **NEVER** fire these at **ANYTHING** that you do not intend to destroy.

DISCLAIMER: We can not be held responsible for any damage or injury caused by intentional or unintentional use of this item or any of our items. We sell

these for display purposes only, and do not condone using these as any type of weapon, or ammunition.
